COMPLETE AND VALUABLE SET OF SWEDISH COPPER-PLATE MONEY.

"Those strange, unwieldy disks of copper, stamped with a value representing only the cost of the metal, once existed in Sweden, where the buyer of old days must have carried his money, not in a purse, but in a cart, and where weight was almost evidently given for weight—a daler's worth of provisions or goods balancing a daler itself in the scales."—Extract from the Preface of Hazlitt's "Coinage of the European Continent."

- 370 Half Daler. Square shape, as all are. Circular stamps in each corner within each of which F R S in large letters. Above, crown. Below, 1747. In the center circle, $\frac{1}{2}$ DALER SILF: MYNT. Below, two arrows crossed. Size $3\frac{5}{8} \times 3\frac{7}{8}$ inches. Weight nearly one pound. Fine for piece. Rare.
- 371 1748 One Daler. Same type as the half daler; the circular stamps a trifle larger. Size $4\frac{7}{8} \times 5\frac{7}{8}$ inches. Weight nearly two pounds. Good to very good. Rare.
- 372 1732 Two Daler. Stamps larger than the smaller denominations. Very boldly struck. Fine for piece. Size about $6\frac{1}{4} \times 7\frac{1}{4}$. Weight almost four pounds. Extra rare.
- 373 1730 Four Daler. Stamps larger, and a trifle off of the edge, but not touching the letters. $9\frac{1}{2}$ inches square. Fine for piece and excessively rare. Weight close to eight pounds. About the largest coin in the world. Seldom offered. The last one offered at auction in this country, I believe, about four years ago, brought about \$20.00. Certainly worth more today.

The above four pieces are, indeed, an interesting and valuable set of one of the most interesting series of the world's coins. Bids will also be accepted for the four pieces as one lot.
